Hello,

Thank you for asking. Yes, you may use libastro for your project.

Have fun and best wishes.

Elwood

Hello everyone, would it be possible to use the libastro library, in a program that is not xephem?

I would need to use it to calculate the sunrise and sunset, to create an astronomical clock for switching on and off the lighting of an aquarium, I currently use pyephem, but I'm thinking of changing the microcontroller and so I have to write all the program in C.

All I need is an example.

Thank you

P.S. this is an online translation. sorry
